“I absolutely adore this pharmacy! You can feel the hometown difference. There is so much comfort when your pharmacists actually know who you are, and understand your needs! The other day I mentioned offhand that I hadn't made it in to pick up my prescriptions the day before because my little boy was not feeling well. They reminded me that they understand and will come to me when I need them. I really appreciate that. You don't get that kind of care and personal treatment at chain pharmacies. You just don't. A Family Pharmacy for my family for always! If you haven't already - you should make the switch.”

-Megan Calcerano

“They are much more friendly and helpful than the CVS I have been using. I would recommend them to anyone interested in a more personal service.”

“My cat Iggy has a life threatening medical issue caused by stress in his environment. The best and last option was to put him on Prozac. I had been struggling for months to find a compounded form of Prozac that my cat would eat without realizing it. I had tried all different forms from all the big name compounding pharmacies around here, all which have been found unpalatable to him. Then a friend told me about this pharmacy and that her cat ate their compounded Prozac with no problem. Here he is 2 months into taking their seafood flavored Prozac and he actually runs into the kitchen when he hears me shake the bottle. I work at a vet office and I recommend all our clients with similar problems to this pharmacy. These people are my heroes. My cat would have never survived if I didn't find them.”

-Nicole Myles

“Always very nice and very quick with my prescriptions as soon as i drop them off I have them in a minute or less. Seem like really nice, closely run, business/people.”
